

Premier Chapitre Android Application

Adrian Kosmaczewski

2009-11-30

akosma software is proud to announce the availability of PremierChapitre for Android in the Android Market¹. PremierChapitre is the first Android application developed in partnership with Stephan Burlot of Coriolis Technologies².

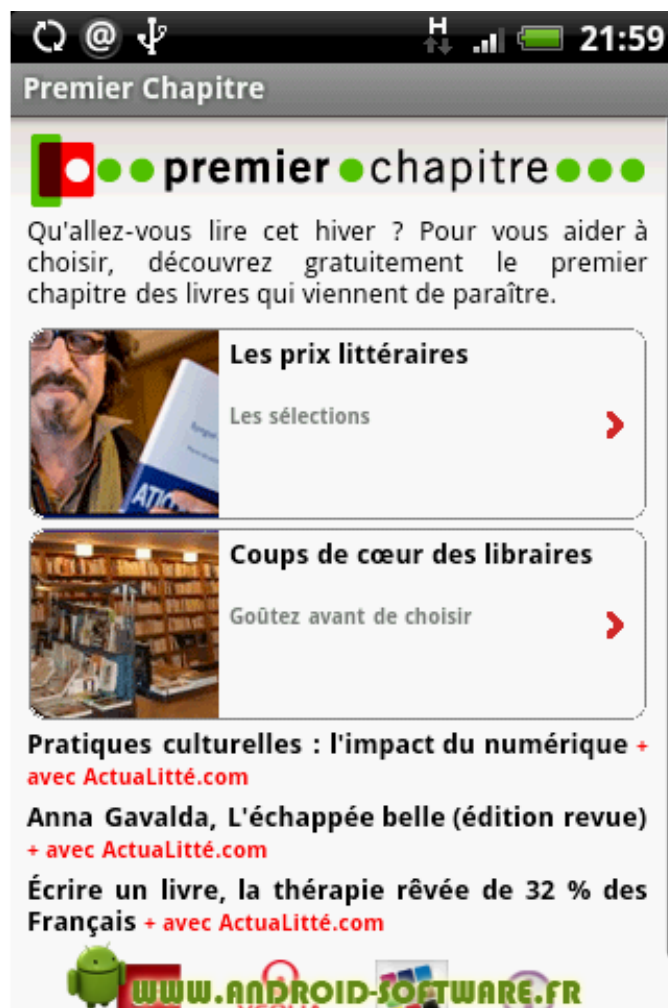

This application is a port of the iPhone application³ (developed by Stephan) of the French service Premier Chapitre⁴. This service, as the name implies, allows users to read the first chapter of newly released books.
