

RooiFonts Press Release

Adrian Kosmaczewski

2009-08-09

Press release on prmac.com¹.

akosma software is pleased to announce RooiFonts 1.0, a simple iPhone OS 3.0 font management tool for iPhone application designers and developers. RooiFonts is a tool for iPhone application designers, helping them to choose the right font for future iPhone applications. It allows them to study in detail, compare similar fonts, and share information with peers about the fonts available in the iPhone OS.
